

# SAÚL CÓRDOBA

## Software Developer | Backend, DevOps & AI Engineer

Villavicencio, Colombia (Open to Remote Work / Relocation)

(+57) 321 961 1182 | [sauleduardo1111@gmail.com](mailto:sauleduardo1111@gmail.com) | [GitHub: Garetetete](#) | [LinkedIn](#) | **English:** B2 | **Spanish:** Native

### PROFESSIONAL SUMMARY

**Electronics Engineer** with two postgraduate specializations: **Industrial Instrumentation & Control** and **Software Engineering**. Full-stack developer focused on **backend (Python/FastAPI and C#/.NET)**, **DevOps** and **generative Artificial Intelligence (AI)** systems. **I designed and built from scratch, solo and end to end, a multi-tenant SaaS platform for AI-powered document analysis, now running in production:** backend, frontend, data model and infrastructure, with 120+ REST/SSE endpoints and 8 services orchestrated in Docker. Additional experience in BI (Tableau/Power BI) for the U.S. oil and gas sector.

### TECHNICAL SKILLS

- **Languages:** Python, C# (.NET), C, C++, Java, TypeScript/JavaScript, SQL, MATLAB.
- **Backend & Frontend:** FastAPI, .NET (Clean Architecture), Node/Express, Angular, React, microservices, API gateways, SSE.
- **DevOps & Cloud:** Docker and Docker Compose, Linux, SSH/server deployment, nginx, Keycloak (OAuth2/OIDC), Azure DevOps, GitHub Actions, CI/CD, continuous deployment.
- **Artificial Intelligence (AI) & LLMs:** Vertex AI, Gemini, Google ADK (multi-agent systems), Claude and OpenAI APIs, RAG with embeddings and semantic search, structured output, inference cost optimization.
- **Data & BI:** SQL, Oracle, PostgreSQL (RLS, JSONB), SQL Server, MongoDB, Redis, Tableau, Power BI, Looker Studio, Pandas.
- **Methodologies:** SDD (Spec-Driven Development), TDD, Clean Architecture.

### PROFESSIONAL EXPERIENCE

#### Software Developer

2025 – Present

SASOFTCO

Villavicencio, Colombia

- **Creator of a SaaS platform for document analysis with Artificial Intelligence (AI) (in production):** designed and developed from scratch end to end — FastAPI (Python 3.11), **120+ REST/SSE endpoints**, PostgreSQL 15 **multi-tenant with row-level security (RLS)** and 8 services in Docker Compose, including a C#/.NET microservice.
- **Generative AI and multi-agent systems (AI/LLM):** orchestration of specialized agents on **Vertex AI and Gemini**, with structured JSON output and a multi-provider abstraction layer (Gemini, Claude, OpenAI).
- **Cut AI inference costs by over 50%** through consumption control, caching and fault tolerance across distributed inference environments.
- **Asynchronous and real-time processing:** progress streaming over SSE, batch processing with concurrency control and retries with exponential backoff; automated ingestion from government open data APIs.
- Backend and frontend development on **.NET microservices with Angular and React** for the government and insurance sectors, with BPMN in Camunda and n8n; Java/Spring monolith with SAP integration; CI/CD pipelines in Azure DevOps.
- **Technologies used:** Artificial Intelligence (AI), LLM, Vertex AI, Gemini, Google ADK, Python, FastAPI, C#/.NET, Angular, React, TypeScript, PostgreSQL, Docker, Keycloak, Azure DevOps, GitHub Actions.

#### Developer / Data Analyst

2024 – 2025

Btilink SAS

Villavicencio, Colombia

- **Data analyst for Aera Energy LLC** (U.S. oil company): **SQL queries against Oracle** databases to extract and consolidate oil operations data.
- Dashboards and reports in **Tableau and Power BI** (production volumes, revenue and outflows) used by several teams for **continuous operations monitoring**.

### EDUCATION

#### Postgraduate Specialization in Software Engineering

2025 – 2026

Universidad de los Llanos, Colombia

#### Postgraduate Specialization in Industrial Instrumentation & Control

2024 – 2025

Universidad de los Llanos — *Capstone: Postgraduate Diploma in IoT Systems and PLC*

#### B.Sc. in Electronics Engineering

2018 – 2024

Universidad de los Llanos, Colombia
